Setting up a family member, adding the patient & making a call

1 Ask relative to go to their app store and download **Aetonix aTouchAway** app on their smart phone or tablet.
For PC, download at https://aetonix.com/download/

2 They should click **Create yourself an account** and follow instructions to register. They will need an email address.
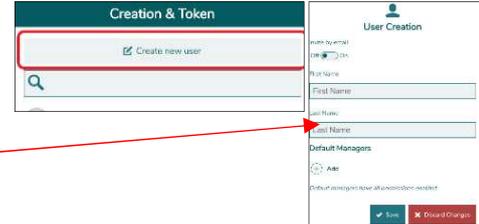

3 Clinical team now adds patient to aTouchAway by clicking **Creation & Token**.
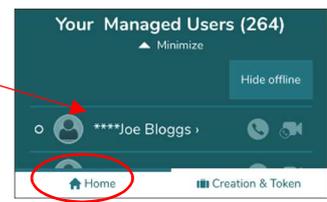

4 Click **Create new user**, enter patient's first and last name then **Save**. They will be added onto every tablet.
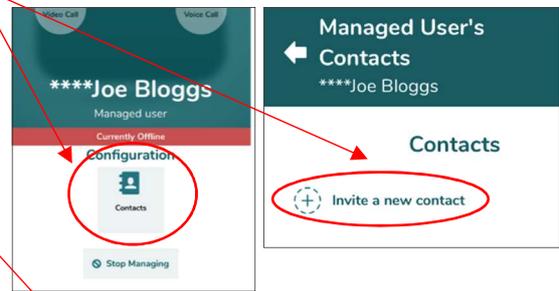

5 Click on **Home** and click on the patient's name.

6 Click on **Contacts** and then **Invite a new contact.**

7 Enter relative's **email address** into the box, once they have registered.

8 Ask relative to accept the request within the app.

You are now set up and ready to video call!

Call or bleep **if you need help.**
