Psychology in Transplantation

6th November 2009, St James Institute of Oncology, Leeds

Dear Colleagues,

Re: Participant Survey

The following is a brief, broad survey of the psychological support services available to BMT patients families & carers, at all the different transplantation units where we work.

We aim to collate results and disseminate (to event participants and possibly to other relevant forums) in a summary form that will **not** identify individuals or services. We aim for this information to be helpful in terms of benchmarking and improving services.

Important: If you **do not wish** your information to be included, **please check this box** and still return the empty form, so that we may be able to gauge representativeness.

Many thanks!

The *Psychology in Transplantation* team

Jane Haworth

Anne Crook

Alex King

Name (optional)				
Professional Role/Position	Psychologist	Counsellor	Psychotherapist	CNS
	Other/Specify:			
Hospital/Unit, Region (opt.)				
Approximate number of transplantation procedures per year at your site:
