King's Health Partners
A Celebration of Education and Training

10 years of innovation, transformation and impact
2009 – 2019 highlights

Education Academy
The Education Academy is formed as a matrix of Clinical Academic Group (CAG) education and training leads and cross cutting themes.

Health Innovation and Education Cluster
A collaboration of 45 organisations across south London is launched, combining expertise of industry, health and education providers to promote innovation at a local level.

Local Education and Training Board
The LETB, a collaboration of education providers and employers, established to identify local needs for education and training to deliver the right people and skills to meet future service needs.

Education Council
The Council is formed as the governance and strategy body of the Education Academy, drawing on senior leaders from the four partners.

Learning Hub extends accessibility
The Learning Hub, delivering accessible learning materials for all King's Health Partners staff and students, now delivers to their networks.
Academic Foundation Programme
A programme of support is established for medical students applying for the Academic Foundation Programme.

Community Education Provider Networks
A federated model of partnerships developed to improve the quality of education for healthcare professionals in south east London is supported by King’s Health Partners.

Postgraduate Certificate in Advanced Medical Training
King’s Health Partners International Education and Training provides a Postgraduate Certificate in Advanced Medical Training alongside global fellowships.

Centre for Adherence Research and Education
The centre delivers blended learning to improve healthcare professionals’ ability to prevent medicines non-adherence.

Learning Hub goes global
Now with 85 courses, the Learning Hub becomes accessible globally.

King’s Health Partners Workforce Development Board
King’s Health Partners is selected as a preferred bidder to develop continuous professional development resources for the workforce.

@kingshealth
